This citation went over international trade. And how the output does affect them. Also what it looks like to import and export goods, Time reference, and value.

International trade: *September 2023 quarter-CSV.*CSV files for download | Stats NZ. (2023).https://www.stats.govt.nz/large-datasets/csv-files-for-download/

List of column names?

Time reference, account, code, counrty_code, product_type good vs. service, value, status

What did the record of the column?

Time ref. The column records the time at which it happened. The account column records if it's an export or import. Counrty_code tells you where it is coming from like country or state. Product_type means what kinda of product it is and if its a good. Code is a system of letters and numbers. Value is how much they made for that courtry or state.

Why did you pick these data?

I picked these data because it would be interesting to see a table set of data for importing and exporting goods.
